FOOD EXPO 2023 Forecast Key Figures

The day after of the high-growth Greek f&b sector

The Greek f&b sector remains a strong economic growth indicator even during these difficult economic and social global conditions.

As a high-income economy, based on the service and the industrial sector, as well as a tourist hotspot and gateway to more than 100 million consumers in Southeastern Europe, Greece is a dynamic market, all year round, with a high appetite for food and beverages imports.

It is a fact that the Greek F&B sector has withstood the challenges and has been recording strong exports, while imports are also picking up. In addition, the expected return of Greek tourism to levels even higher than 2019 are also a proof that Greece is offering great opportunities for investments and business ventures.
